

Our Efforts from 1969 toward the Next Half Century

GAS & POWER
+ SERVICE × GLOBAL

Takashi Uchida

President and CEO, Tokyo Gas Co., Ltd.

September 26, 2019

50th Anniversary of LNG's Introduction to Japan

(million tons)

Volume of LNG Imported to Japan

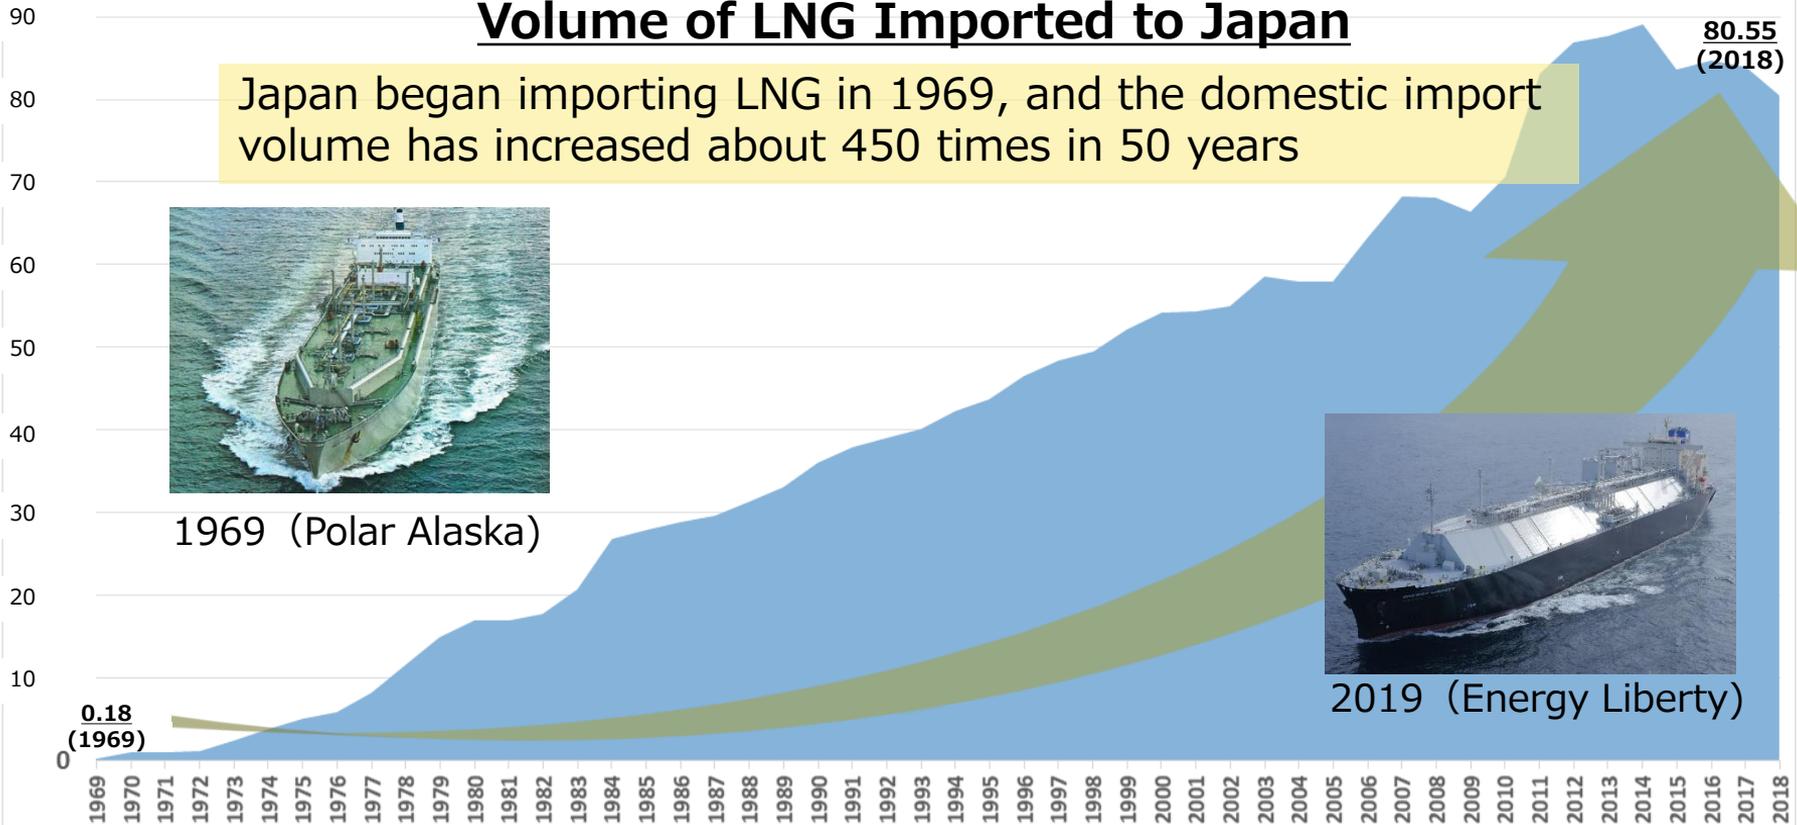

Japan began importing LNG in 1969, and the domestic import volume has increased about 450 times in 50 years

1969 (Polar Alaska)

2019 (Energy Liberty)

Our Contribution to the LNG Industry: Demand Side

- Past**
 - Used natural gas extensively to create demand and contribute to realizing a low-carbon society
 - Used 50 years of experience in building LNG value chains to expand our areas of activity all over the world and contribute to expansion of the LNG industry
- Future**
 - Continue pursuing initiatives to use natural gas extensively, both in Japan and overseas, in conjunction with renewables and digital technologies

● Extensive use of natural gas

Decentralized energy systems

"Ene-Farm" fuel cells

Hydrogen refueling stations

● Overseas business

City gas distribution in industrial estates in Thailand

On-site energy services in Malaysia and USA

Our Contribution to Developing the Global LNG Market

Past

- Leveraged strength as a purchaser with genuine demand from 10 million customers to contribute to development (or FID) for greenfield projects by committing to long-term contracts

Future

- Strengthen relationships with global partners, actively pursue innovative LNG procurement and contribute to the expansion and fluidity of the market

- Centrica : Location swap & joint procurement from Mozambique project
- Shell Eastern Trading : Coal linked price & carbon neutral LNG

Toward the Next Half Century

Tokyo Gas will now target the next 50 years, doing its utmost to create low-carbon societies by developing the LNG industry and the global LNG market
